Marion Police Department
1001 W Deyoung St.
Marion, IL 62959

To Chief of Police or Whom It May Concern:

I would like to make a complaint because I never yet received a police report for new damage to my camper found on September 14, 2024. I called Marion Police Department on September 14, 2024, a couple of times to make a police report about new damage to my camper found when I was at Walmart parking lot, after shopping. I received a flat tire that was inflatable and worked after we took to Walmart auto, I had huge big ding under big window on passenger side of camper and also a broken speaker was also part of the new damage where a piece of it looked like it was thrown to the driver side and must have happened at walmart. I had video footage right before we got to walmart where the new damage was not present to my camper at Sam's Club parking lot on the way to walmart. I spoke with Police Officer Lawrence twice who never gave me police report numbers and called for supervisor on September 14, 2024, but Police Officer Lawrence showed a 2nd time and never gave me police report on September 14, 2024. I came in-person to talk to supervisor for complaint form and supervisor on duty nextday on Sunday told me to wait and that he would write a report. However, I never received a police report after I sent video footage to Officer Lawrence email beginning of October 2024 and recently to Sean working at records department? These 2 emails were

Dlawrence@marionpolicedept.com and mpdrecords2@policedept.com It appeared the new damage happened after we got to walmart on my own video footage of long video can not email to you because it was too long for email. I did send some other video footage where new damage was not yet present the same day when we were at Sam's Club. The information I heard about a witness calling seemed a little inaccurate story that later police were confused and thought I had made the witness call for police to come and hoping some video footage and a police report could help verify things for insurance. My own video shows Police Officer Strong acknowledged I had not made the call for them to come but at a later time another officer seemed to think I called prior to the camper being damaged? I did not know about the camper damage when Police Officer Strong was at my camper on September 14, 2024 and had not yet seen it to ask him for a report is why I called later and Officer Lawrence arrived.

My own video footage was requested by Officer Lawrence to make report for me I never have received. I would appreciate your time to look into this. My insurance company I pay full coverage to has not paid me for any dings since I bought my camper new April 2021 insured with Progressive. I assume they require a police report.

I would like to make FOIA request. I would like to request camera footage from your police officers Strong and another police officer who arrived on a call from somebody else about a passenger in my truck before I went shopping at Walmart in Marion, IL to see if the damage was present on their police cameras when we first arrived at Walmart?

Thanks for your help.
